***Response to Amendment***

The following is in response to the amendment filed on July 10, 2006.

***Allowable Subject Matter***

Claims 1-4, 6-10, and 12-15 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or suggest a press device for pressing a web comprising a press shoe, a stop member arranged downstream of the press shoe, and eccentric members for positioning the press shoe, wherein the stop member is fixed in a selected stop position at least by a spacer element disposed in a recess in the press shoe support and abutting the stop member, and wherein the spacer element in a first position abuts the stop member in a first stop position and in a second position abuts the stop member in a second stop position in the machine direction.

Accordingly, the prior art does not disclose or suggest a method for controlling a pressure curve in the machine direction of an extended nip press that includes providing such a stop member downstream of a press shoe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Response to Arguments***

Applicant's arguments filed July 10, 2006 have been considered.

The arguments and amendments to the claims have overcome the rejection set forth previously under 35 U.S.C. 103(a) over Snellman et al (US 6,083,352) in view of Meschenmoser et al (US 5,676,799). It is recognized that neither of the applied references alone or in combination, nor any of the other references previously cited teach the claimed features of the downstream press shoe stop member in combination with the eccentrically arranged members for controlling the position of the press shoe and thereby controlling the pressure curve.

Reasons for allowable subject matter regarding claim 5 was inadvertently omitted in the previous office action. It was the examiner's intent to indicate claim 5 as allowable for the reasons given above.

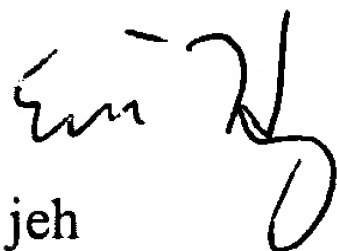

The information disclosure statement provided by Applicant has been considered by the examiner. An initialed PTO-1449 is provided herein.
